

Royal Oral & Maxillofacial Surgery Study Club *First Open Study Club*

April 29, 2015 7:00-9:00 PM

Venue: Sheraton Parsippany Hotel

“Restorative Decision Making in Implant Dentistry: Endodontically Treated Teeth; When to save and when to extract”

Presented by Dr. Stephen Hudis

Dr. Tamimi at Royal Oral & Maxillofacial Surgery is proud to announce the first open study club.

This lecture will discuss the art and science of Implant Dentistry has made considerable advances since it's introduction in the country over 30 years ago. The question for the restorative dentist in evaluating endodontically treated teeth is “When to save and when to extract”. A review of the literature and exploration of clinical examples of success and failures of both implants and endodontically treated teeth will help to shed some light on this issue.

Dr. Hudis has a Certificate in Prosthodontics from the New York University College of Dentistry Advanced Education Program. He is an Associate Clinical Professor in the Jonathan and Maxine Ferencz Advanced Education Program in Prosthodontics at New York University College of Dentistry and also a volunteer professor at NYU. He has a successful private practice limited to Prosthodontics in Princeton, New Jersey
